Risk Review Required Questionnaire

IN ORDER FOR SAR TO COMPLETE THE REQUESTED RISK REVIEW, PLEASE ANSWER THE QUESTIONS BELOW AND UPLOAD THE COMPLETED DOCUMENT THROUGH THE [SECURE SUBMISSION FORM](#)

Host university name:

University contact email address:

Candidate name:

Candidate email address:

Current country location:

If the candidate is now outside their home country, when were they last in their home country (day, month, year.)

If the candidate is now outside their home country, what is their current visa status in their current location and when will it expire? (day, month, year.)

Does the candidate hold any citizenship or stable legal status outside their home country?
If so, which?

Has the candidate ever been convicted of a crime?

☐

Yes

☐

No

☐

Other

Has the candidate ever participated in any human rights violations against an individual or group?

☐

Yes

☐

No

☐

Other

USE OF GENERATIVE ARTIFICIAL INTELLIGENCE TOOLS

SAR discourages the use of artificial intelligence (AI) in SAR applications, particularly in the “Risk Statement” sections of the application. While we understand that AI has many useful applications, SAR seeks to understand applicants’ risk situations and academic work as stated in their own words. If you use generative AI (AI that creates content for the user, like ChatGPT and others) in any of your materials submitted to SAR, we ask that you include an acknowledgement of this in your materials. The AI acknowledgement should identify:

- The type of AI you used (i.e., which tool was used)
- The parts of your SAR application for which AI was used
- Whether you are willing to provide non-AI-assisted materials, if requested later in the SAR review process.

Suspected use of generative AI that is not disclosed in an individual’s application may result in an unsuccessful application.

☐

Acknowledgment is made of the SAR policy regarding generative artificial intelligence. Any AI tools used, along with the specific sections where they were applied, are fully disclosed in the candidate’s materials, and the candidate agrees to provide non-AI-assisted materials upon request.
